PROFILE

Final-year BSc CSIT student and junior full-stack web developer with 6+ months of hands-on experience building production-grade web applications. Core stack: Next.js, TypeScript, Tailwind CSS, Prisma, and PostgreSQL, with authentication and role-based access handled via Clerk. Built and shipped a full SaaS product from database schema to a finetuned caption-generation model to billing, and has since applied the same end-to-end approach to e-commerce and content-driven projects. Comfortable owning a project from planning through deployment, with a systematic, detail-first approach to development.

EXPERIENCE

Junior Full-Stack Developer — Project-Based

6+ Months

- Social Media Management System (PostSathi) — built a full SaaS platform for content creators to plan, generate, and publish social posts, including a finetuned caption-generation model, Zernio API publishing integration, Stripe billing, and Clerk-based role access control.
- E-Commerce Platform — developed a full-stack online store with product catalog, cart and checkout flow, and an admin dashboard for inventory and order management.
- Blog Website — built a content-focused blog platform with a clean publishing workflow, SEO-friendly page structure, and responsive design across devices.
- Worked across the full stack on each project — database schema design, API routes, authentication, UI, and deployment — using Next.js, TypeScript, Prisma, and PostgreSQL.

EDUCATION

Bachelor of Science in CSIT

2023 – Present

Prithvi Narayan Campus, Tribhuvan University, Nepal

Final-year student. Capstone project: PostSathi — a social media content management SaaS with ai caption generation, automated publishing, and subscription billing.

SKILLS

- Next.js & TypeScript
- Tailwind CSS
- Prisma & PostgreSQL
- Clerk (Auth & RBAC)
- REST API
- Stripe Billing Integration
- Vercel
- Git & Deployment
